DIRECTIONS TO MENSSANA RESEARCH, INC.

The Breath Research Laboratory is located on the campus of the New Jersey Institute of Technology at

Menssana Research, Inc
EDC III
211 Warren Street
Newark, NJ 07103

Telephone: 973.643.5464

IF YOU ARE DRIVING:

Before you come, contact Samantha at 973.643.5464 to arrange your parking. If you don't do this, you risk a parking ticket and fine from the NJIT police.

In New Jersey: Take the western spur of I 95 and exit on 15W.

After passing through the toll booth, take 280 West towards Newark.

After crossing the drawbridge, take exit 14B to Dr. Martin Luther King Jr. (MLK) Avenue.

Warning: this exit is very badly marked. Slow down after crossing the drawbridge and stay in the right hand lane – the exit comes immediately after a curve to the right.

At the bottom of the exit ramp, turn left.

At the stop sign, turn left on to MLK Avenue and stay in the right lane.

Pass under the bridge and stay on MLK as it jogs to the right crossing Orange.

Cross traffic lights at James and Central.

Turn right on Warren – it is the next main intersection.

The next main intersection is Lock.

Just a few feet after crossing Lock, turn right on Nuttman, then left into the parking lot of EDC III.

Confirm your parking arrangements with the security guard.

Come to the front of the building, follow the instructions on the keypad, and the receptionist will admit you.

IF YOU ARE COMING BY SUBWAY FROM MANHATTAN:

On arriving at Newark-Penn station, take the escalator to the extreme right all the way down.

The first escalator takes you to a landing, then take the second escalator down as well. Upon exiting the escalator go left. You will see a marble staircase leading to the Newark City Subway.

Warren Street is the third stop on the train. When you exit the train, use the staircase on the right.

Walk to the end of the block and turn right. You will see a sign saying 'Lock' straight in front of you.

Cross over Lock street, and then cross over Nuttman street.

Our building, EDC III, will be immediately on your right. It is a glass building with a bulging frontage.

Follow the instructions on the keypad on the right side of the door and we will buzz you in.
